DATE OF INFO.	[REDACTED]	SUPPLEMENT TO REPORT NO.	[REDACTED]

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES. WITHIN THE MEANING OF TITLE 18, SECTIONS 702 AND 703 OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1X

1. The Sachsenisches Serumwerk is located on Circustrasse 40 in Dresden-Hausstadt. A branch unit, Sachsisches Serumwerk, A. G., Werk Cöllnitzau, is located in Cöllnitzau, Post Halberstadt (Kreis Leipzig). This branch is a serum farm and covering station for Land Sachsen-Anhalt and Westsachsen. Despite severe bombing damage suffered during World War II, the facilities at Dresden were completely restored in 1945-1946. The Serumwerk is a privately-owned corporation.
2. The director of the Serumwerk is (fmu) Eethge. The staff consists of approximately 350 people of whom at least 15 are professional chemists, biologists and physicians.
3. Activities at the Serumwerk consist of serum production, pharmaceutical production and performance of official examinations and tests. Serum production consists of the preparation of commonly used vaccines, such as tetanus, diphtheria, scarlet fever, gangrene and botulism serums, for active and passive immunization. In addition the plant prepares test substances for blood group determination, tuberculin (Moro method) and Ponndorf's A and B skin vaccine. The Ponndorf A vaccine is prepared from autolysates of *Tuberculosis* *avium* and is applied on epithelial scarifications. Ponndorf B vaccine, also called Rhewakutin, contains protein material from *Influenza*, *streptococcus*, *staphylococcus* and *pneumococcus* organisms and is employed to initiate the body's defense mechanism.
4. Another preparation of this part of the firm is Neo-Pyocyanase, a disinfectant made from pyocyanus cultures. It is indicated in the treatment of conditions such as tonsillitis and open sores but has been largely replaced by sulfamamide and antibiotic therapy. Vaccineurin, an autolysate of staphylococci, is a similar product with a neurotropic action. It is used in the treatment of neuralgia and neuritis.
5. The following important pharmaceuticals, produced by the Serumwerk, are widely accepted by East German physicians:
 - a. *Mabren*, a muscle extract for intravenous and oral medication, contains nucleophosphoric acids. It is indicated in treatment of functional
